Rosselle Macabata (Zellie)

Software Engineer | 7+ Years Experience | React • TypeScript • Go | Building Meaningful Products in Tech

Brooklyn, New York, United States

Summary

As a software engineer with 7+ years of experience, I specialize in developing scalable, accessible web applications using React, TypeScript, and Go. At Clear Channel Outdoor, I contributed to modernizing legacy systems, creating a shared design system, and leading accessibility enhancements across internal tools. My work supported 1000+ of employees across 28 U.S. markets by improving data consistency and usability. At employHER, I led a team of 4 engineers where we built the MVP of a web-based video platform that connects women and non-binary people to inclusive employers.

I am committed to building equitable and human-centered technology. My passion lies in designing products and tools, that bridge gaps and foster collaboration, as demonstrated by mentoring engineers during technology transitions and developing solutions that prioritize inclusivity. Working with teams that focus on social impact and digital equity continues to drive my professional purpose.

Skills: React, TypeScript, Go, Python, Docker, AWS, PostgreSQL

Experience

Clear Channel Outdoor

Full-Stack Software Engineer

May 2021 - November 2025 (4 years 7 months)

Seattle, Washington, United States

- Built and maintained React/JavaScript applications used by 1,000+ internal users (Account Executives and Installers) across 28 U.S. markets.
- Developed a Python-based data synchronization tool that reduced cross-system sync times from multiple hours to minutes in test environments, improving data freshness and operational efficiency.

- Designed and implemented a shared TypeScript UI component library, standardizing design patterns across multiple internal products and reducing duplicated frontend effort.
- Led accessibility improvements across internal tools, improving usability and compliance for a diverse internal user base.
- Mentored 2 engineers transitioning from Ruby to React, accelerating onboarding and improving frontend delivery on legacy applications.

employHER

3 years

Lead Engineer

September 2020 - March 2021 (7 months)

Seattle, Washington, United States

- Led a cross-functional team of 4 engineers to design and launch a web platform serving women and non-binary professionals from concept to MVP.
- Owned frontend architecture and API design for the MVP, building modular React + TypeScript components and RESTful services that supported user onboarding and profile creation.
- Partnered closely with design and product to deliver a responsive, accessible user experience across mobile and desktop.
- Supported initial go-to-market launch, enabling both end users and partner organizations to create and manage profiles at launch.
- Equity holder, with ownership aligned to long-term product and company success.

Founding Full-Stack Software Engineer

April 2018 - September 2020 (2 years 6 months)

Greater Seattle Area

- Built and launched a greenfield product as a founding engineer, owning frontend architecture, backend APIs, and core system design.
- Developed modular React/TypeScript components and RESTful services, supporting early user onboarding and platform adoption.
- Collaborated cross-functionally and mentored engineers, helping establish engineering patterns and development workflows.

CDK Global

Technical Analyst

2018 - 2020 (2 years)

Seattle, Washington, United States

- Managed DNS and system integrations for enterprise clients.

- Supported SaaS deployments and cross-team collaboration on infrastructure improvements.

CDK Global via APEX Systems
Software Implementation Specialist
2018 - 2018 (less than a year)
Seattle, Washington, United States

- Coordinated client onboarding, QA, and software rollouts for automotive platforms.

Association for Women in Computing (WWU)
President
September 2016 - June 2017 (10 months)
Bellingham, Washington Area

Western Washington University
1 year 1 month
Web Manager
March 2016 - March 2017 (1 year 1 month)
Bellingham, Washington Area

C++ and Python Teacher Assistant
June 2016 - December 2016 (7 months)
Bellingham, Washington Area

Education

Western Washington University
Bachelor's Degree, Computer Science · (2013 - 2017)
